Ivan Bazan

Backend Go Developer

+375 (29) 853-70-60 | telegram | ivanonlane@gmail.com | github.com/hronovv

Backend developer focused on Go. Interested in building reliable and scalable backend systems. Open to **internship** or **junior** backend role; considering **remote** work or **on-site**.

Education

Belarusian State University of Informatics and Radioelectronics — Minsk, Belarus
B.Sc in Computer Science and programming technologies — *Sept. 2024 – July 2028*

School №25 — Brest, Belarus
3.9 GPA. Math, Informatics, English and Physics — *Sept. 2013 – June 2024*

Courses

DSA, Discrete Math, Computer Architecture, DB, Assembly (base)

Experience

Undergraduate Teaching Assistant – Assembly Programming — Sep. 2025 – Feb. 2026
Belarusian State University of Informatics and Radioelectronics — *Minsk, Belarus*

- Assisted the course instructor in creating new lecture and presentation materials on Intel 8086 and Motorola MC68HC11 assembly programming.
- Revised and improved existing teaching materials to make them clearer, more structured, and easier for students to follow.
- Updated and redesigned laboratory assignments for the "Software Construction" course to align them with the renewed curriculum and learning outcomes.

Projects

FlatStalker | *Go, PostgreSQL, Gin, Telegram Bot API, Mini App* — July 2026 – Present

- Built a rental-watch service that polls **Kufar.by** search URLs and sends new listings to Telegram; parsed cities, microdistricts, and metro from search links.
- Implemented a background worker with **per-plan intervals** (FREE / PLUS / PRO), first-run snapshot seeding, and `seen_ads` tracking so users are not notified about already-seen ads.
- Shipped a Telegram Mini App cabinet: add/pause/delete watches, plan catalog, RU/BY i18n, and Telegram WebApp auth for the REST API.
- Added paid plans with Telegram invoices (bePaid), plan expiry, upgrade/downgrade rules, and a ban flow with a dedicated access-closed screen.

Pulse – Electronic Medical Record | *Go, PostgreSQL, Redis, Docker Compose, React, TS* — May 2026

- Built a full-stack EMR platform with **role-based access control** for patients, doctors, and administrators; designed REST handlers, repository layer, and PostgreSQL schema for medical cards, visits, prescriptions, and ICD disease catalog.
- Implemented **Redis-backed server-side sessions** with bearer-token authentication, bcrypt password hashing, and middleware-based authorization guards.
- Developed appointment request workflow (create, approve/reject, cancel) with database constraints to prevent duplicate pending bookings and automatic visit creation on approval.
- Added reusable **search and pagination** across list endpoints and admin dashboard; applied SQL migrations with golang-migrate for schema versioning and seed data.
- Containerized the full stack (API, PostgreSQL, Redis, migrations, React SPA behind Nginx) with Docker Compose and Makefile-based local/CI workflows.

Financial System | *Go, PostgreSQL, REST API, JWT, Swagger UI, Docker Compose* — March 2026 – April 2026

- Designed and implemented a RESTful backend with a **layered architecture**: transport (REST handlers), service layer, repository layer, and domain models.

- Integrated PostgreSQL as the primary data store with transaction-safe operations and structured SQL queries.
- Implemented authentication and authorization with JWT, supporting role-based access for admins and clients.
- Documented and tested all public endpoints using Swagger UI/OpenAPI to simplify integration for frontend and third-party services.
- Containerized the application and database with Docker and Docker Compose for reproducible local development and deployment.

Technical Skills

Languages: Go, C/C++, Python, C#, JavaScript, SQL (PostgreSQL)

Frameworks & libraries: Gin, Fiber, Gorilla Mux

Backend & API: REST, gRPC, OpenAPI/Swagger, JWT, Redis sessions, RBAC

Databases: PostgreSQL, SQLite, Redis

Dev & DevOps: Git, GitHub, Docker, Docker Compose, Nginx, CMake, Makefile, Air, goose

Languages

Russian — Native | English — B2 | Belarusian — Native
